TECHNICAL SKILLS

Research Experience	Formal Verification, Cyber-physical Systems, Data-driven Controls
Programming	Python, R, Rust, C/C++, LaTeX, Bash
Libraries/Frameworks	PyTorch, Tensorflow, Apache Spark, Gurobi, ONNX

WORK EXPERIENCE

Galois, Inc., 421 SW 6th Ave, Portland, OR 97204 2019-Present
Research Engineer

- Awarded a Phase I SBIR grant on vehicle autonomy and performed as a principal investigator (PI) on the project.
- Excelled in developing research methodologies, writing sophisticated software prototypes, and exceeding project deliverables.
- Contributed significant research and engineering to high-profile DARPA programs at the company: SSITH (2019-2021), Assured Autonomy (2019-2022), SDCPS (2021-2023), Space-BACN (2022-2023), and FIRE (2024-Present).

Johns Hopkins APL, 11100 Johns Hopkins Rd, Laurel, MD 20723 2019
Electrical Engineering Intern

- Research Projects: troposcatter communication system feasibility, FDTD solver for bodies of revolution, and methods and benchmarks for an adaptive radar resource manager (RRM).

Summit Wireless Technologies, 20575 Von Neumann Dr., Beaverton, OR 97006 2018-2019
Electrical Engineering Intern

- Contributed engineering across several teams including the development of a RF power meter, a Linux wireless driver, and the wireless audio stack core.

Portland State University, 1825 SW Broadway, Portland, OR 97201 2017
Climate Research Intern

- Research Project: *Sensitivity of Global Methane Bayesian Inversion to Surface Observation Data Sets and Chemical-Transport Model Resolution.*
- Presented project at the Center for Climate and Aerosol Research (CCAR) symposium, Council on Undergraduate Research (CUR) symposium, and the American Geophysical Union (AGU) Fall Meeting.

EDUCATION

Portland State University, OR *June 2016 - June 2019*
BS Electrical Engineering *Summa Cum Laude* GPA: 4.00
Portland Community College, OR *March 2015 - June 2017*
Transfer Program GPA: 4.00

PROGRAM COMMITTEES

26th ACM International Conference on Hybrid Systems: Computation and Control 2021
Repeatability Evaluation Program Committee *HSCC 2023*

25th ACM International Conference on Hybrid Systems: Computation and Control 2021
Repeatability Evaluation Program Committee *HSCC 2022*

7th IFAC Conference on Analysis and Design of Hybrid Systems 2021
Repeatability Evaluation Program Committee *ADHS 2021*

24th ACM International Conference on Hybrid Systems: Computation and Control 2021
Repeatability Evaluation Program Committee *HSCC 2021*

AWARDS

Generalized RAcing Intelligence Competition (GRAIC) 2022
1st Place Head-to-Head Category *CPS-IoT Week*

Electrical and Computer Engineering Capstone Poster Competition 2019
Best Overall Project *PSU ECE*

Intel Compute Stick Challenge 2016
1st Place *Intel*

FUNDED PROJECTS

SBIR: Phase I: RHEIA-F: Robust High-fidelity Energy-Informed Autonomy Framework 2024
*PI: **Ethan Lew**; Co-PI: Nicola Bezzo* *AFRL Funded, Galois Inc. Award: $179,934*

- We propose the Robust High-fidelity Energy-Informed Autonomy Framework (RHEIA-F), an advanced energy-aware mission planning framework for unmanned aerial systems (UAS). This framework integrates comprehensive energy management into UAS missions, providing both off-board and on-board components. These capabilities are directly transferable to other Department of Defense (DoD) embedded systems, autonomous vehicles, and space systems.
